SOLIDS, LIQUIDS & GASES

Date: - 03-11-20

Questions & Answers

Q3. Write down the difference between solid, liquid and gases?

Ans.

SOLIDS	LIQUIDS	GASES
1. Molecules of solids are tightly packed to each other.	Molecules of liquids are loosely packed.	Molecules of gases have much greater space between them.
2. Solids have fixed shape.	Liquids does not have fixed shape.	Gases also does not have fixed shape.
3. Solids cannot flow.	Liquids can be poured easily and can flow.	Gases will flow in every direction.
4. Example: Pencil, book, chair etc.	Example: Water, milk, oil	Example: Air, cooking gas etc.
